

Sanjid Hossain

Web and Full Stack Developer

Jubail, Eastern Province, Saudi Arabia

mdsanjidhosen@gmail.com | +966 55 845 9714

Alternate: sanjidhossain1910@gmail.com

PROFILE

Self-taught developer building web applications and mobile apps through personal projects. Hands-on practice with React, Next.js, TypeScript, Node.js and React Native. Built a live e-commerce website and a social media website; currently developing a school management mobile app. Seeking an entry-level opportunity in web, full stack or mobile app development with backend integration.

TECHNICAL SKILLS

Web development: JavaScript, TypeScript, React, Next.js, Tailwind CSS

Backend and databases: Node.js, Express, REST APIs, MongoDB, PostgreSQL

Mobile development: React Native, Expo, Expo Router, NativeWind, i18next

Tools and services: Git, GitHub, Vercel, Cloudinary

PERSONAL PROJECTS

NexWearBD | E-commerce website | Live

Next.js, TypeScript, MongoDB, Tailwind CSS, Cloudinary, Vercel

- Built a shopping website with product browsing and an admin interface for managing products.
- Implemented product creation and editing, image uploads and product data storage.
- Practised connecting frontend pages to backend functionality and deploying a web application.

School Management System | Mobile app | In development

React Native, Expo Router, TypeScript, NativeWind, i18next

- Developing an app for school administrators, teachers, parents and students.
- Built screens for home, student information, tuition, notifications and profiles.
- Working on backend integration for school operations, with English and Bangla interface support.

Social Media Website | Learning project | Not currently deployed

- Built a social media website as a personal project to practise web application development.

INDEPENDENT LEARNING

Learning software development through hands-on projects, technical documentation and implementation practice, with a focus on web applications, mobile interfaces and backend APIs.
